### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 30-32 are rejected under 35 U.S.C. 102(b) as being anticipated by US 2,713,196 (Brown). Brown teaches conducting a brazing operation under controlled atmosphere (col. 5, l. 33); said brazing operation being conducted in such a way as to establish a mechanical bond between at least one defined part of the support (abstract) and at least one defined part of the coating, when the coating comprises tantalum, the brazing material comprises nickel, chromium, silicon, or boron, or a mixture thereof, or a silver based material or when the coating comprises titanium the brazing material comprises silver or an alloy with titanium and when the coating comprises zirconium, the brazing material comprises an alloy with a base of zirconium, copper, or nickel, or a silver based material (col. 3, 30-75).

Claims 30-32 are rejected under 35 U.S.C. 102(e) as being anticipated by US 6,413,651 (Yan). Yan teaches conducting a brazing operation under controlled atmosphere (col. 3, ll. 1-5); said brazing operation being conducted in such a way as to establish a mechanical bond between at least one defined part of the support (col. 3, ll. 10-21) and at least one defined part of the coating, when the coating comprises tantalum, the brazing material comprises nickel, chromium, silicon, or boron, or a mixture thereof, or a silver based material or when the coating comprises titanium the brazing material comprises silver or an alloy with titanium and when the coating comprises zirconium, the brazing material comprises an alloy with a base of zirconium, copper, or nick, or a silver based material (col. 3, ll. 30-65).

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 30-32 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 26 of U.S. Patent No. 6,702,177. Although the conflicting claims are not identical, they are not patentably distinct from each other because the

Art Unit: 1725

claim 26 of U.S. Patent No. 6,702,177 meets the limitation of claims 30-32 of the instant application.

***Conclusion***
